

# Role Description

## Consultant

Reference: M02-011-035-01

---

### **About 4way**

4way is a unique Small Medium Enterprise (SME) specialising in Intelligent Transport Systems (ITS) in both the strategic and urban road sectors. We listen carefully to our clients' needs and work proactively as a team to build open, honest, trusting and long-lasting relationships.

Our range of services includes ITS infrastructure design, ITS operational consultancy, road lighting consultancy and design, traffic signals consultancy and design, smart motorways and expressway development, smart cities consultancy and design, technology implementation, management and commissioning, business strategy, feasibility studies and value management.

Since our inception in 2010 we have grown in a sustainable manner through high volumes of repeat business and new project work, won on the strength of our reputation for delivering high quality in the most demanding of environments. Ranked the 6<sup>th</sup> top company in ITS in the 2017 CIHT Consultants Directory (moving up from 10<sup>th</sup> in 2016) we are now seeking to propel 4way to new heights and are looking for high calibre individuals at all levels to join us on our journey.

### **Role**

Consultant, based in either Stockport or Leamington Spa, with opportunities for project roles on site. You will apply consultancy skills, working across a range of disciplines and services, liaising with technical experts in the technology consultancy and development fields to produce technically excellent output.

### **Requirements & Skills**

- Degree qualified with 3 years' relevant experience, or HNC/HND with 5 years' relevant experience.
- A good working knowledge of the ITS, traffic signals and/or road lighting sectors.
- Ability to build and maintain close relationships with stakeholders, understand their needs and generate workable solutions which provide real benefits to road users.
- Recent demonstrable experience of developing new concepts, strategies and approaches for managing the movement of people, goods and traffic.
- Ability to identify and assess options, ranging from new operational procedures and methods of working, to new types of technology, considering the drivers and constraints of the modern transport environment.
- Good written and oral communication skills, with specific skills in stakeholder engagement.

### **Benefits**

As the only SME in the ITS sector, 4way career opportunities stand out from the crowd. We challenge our people to push technical boundaries every day, to improve value for our clients and exceed their expectations. We continually invest in professional development, encourage the entrepreneurial spirit of our people and offer a competitive salary and benefits package.
